

ENROLLMENT INTO THE DATABASE THROUGH 12/31/2011 - CUMULATIVE

Combined total number of charts screened:	10,154
Number of subjects passing criteria from above:	6,126
Percent passing:	60.3%
Number of subjects failing registry criteria from number screened:	4,028

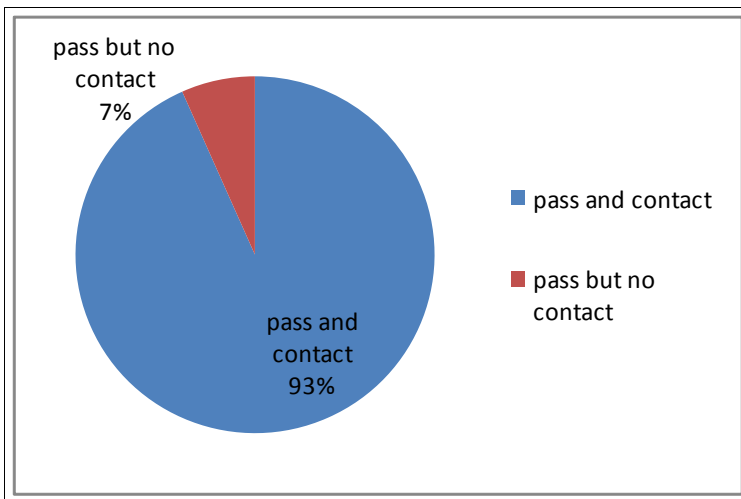

Reasons for failure to pass criteria

Fail Reason	IP	OP	Total
bilateral cva	206	10	216
criteria	1		1
deceased	11		11
dementia	328	3	331
dual diagnosis - TBI & CVA	315	16	331
encephalopathy	261	8	269
etoh or drug hx	350	4	354
foreign language barrier	350	20	370
medically fragile condition	172	4	176
mental retardation	41	6	47
moving out of geog area	156	6	162
multiple sclerosis	47	7	54
other neuro condition	236	22	258
Parkinson's disease	125	1	126
psych hx	308	20	328
seizures-predating CVA or TBI	320	8	328
sensory problem- vision or hearing	224	3	227
tumor - comorbidity	430	9	439
Totals	3,881	147	4,028

What happened to the patients who passed criteria for admission to the patient registry?

pass and contact	5,714
pass but no contact	412
Total:	6,126

What was the outcome from the patients who were approached about participating?

consent	3,702
decline	1,245
maybe later	376
no resolution	391
Total:	5,714

Total Enrollment to date:

control	243
CVA	2,555
minimally conscious	17
TBI	887
Total:	3,702
